

File-Lok I™ prevents unauthorized access to disk and CD-Rom drives.

This security device prevents unauthorized copying of data from your network or hard drive and helps prevent viruses. FILE-LOK I™ secures most 3.5" and CD ROM and Macintosh floppy disk drives with flat bezels. This product also allows the user to secure a diskette into the disk drive to prevent accidental or intentional removal. This product adheres to the flat front of the disk drive with our "Super Bond" adhesive. Since File Lok I™ attaches to the outside of the drive – this allows you to secure media in or out of the drive. Will work on all drives - CD, diskette, ZIP, etc. - where the front bezel is flat and has a minimum mounting area of 2.16 x 5.08 cm. Keyed Alike and Master Keyed options available.
