

Qualtec security cables are available in two colors, two fitting types and multiple stock lengths. Additionally, you can customize the length to your exact needs at a minimal cost.

Colors that are available are: Putty (beige) and smoke (translucent black). The eyelet-to-eyelet cable fittings allow one end to weave through the other. This is ideal when needing to lasso an object, weave it through expansion component(s) and then terminate the end with a lock. With the ball-to-eyelet cable (our most popular), you can weave the eyelet through any of our expansion accessories or cables and the ball fitting is larger than the eyelet hole, which provides a stop. Once weaved through the components, you simply terminate the eyelet with a lock.

For special requirements where shorter, longer or exact lengths are needed, Qualtec will make the cable the length you want. There is no minimum and the additional cost is very minimal.
