

The patented Notebook Kit II™ is the most versatile and universal theft deterrent system available for *mobile* computers!

Simply lasso the cable to a secure anchoring point and attach the lock into the security slot in your notebook. Unlike other products on the market, this kit provides you the ability to disconnect the cable from the system. This allows for different anchoring techniques as well as the ability to expand your system to secure peripherals such as printers and external drives.

The Notebook Kit II™ provides you everything you need to secure your computer. You get a round “Super Bond™” plate for an anchoring point for your workstation or a peripheral. A five-foot (1.5m) cable for when extra length is needed. And when your traveling, your kit can be stored in the travel pouch so you do not scratch your computer. Expand your system with any of our accessory products.
